## EXPERIENCE

### AltSchool Africa School of Software Engineering — Student

April 2022 - PRESENT

- Studied programming using a structured and proven 3 semester curriculum that enables students to become job ready with a complete set of software development skills.
- Took technical courses from 5+ instructors with expertise in web development.
- Interacted and brainstormed live with instructors 2 times a week every semester.
- Completed real-world projects and received code reviews/feedbacks from instructors and the school community of 500+ students.
- Placed in a team circle of 10 and worked together to solve problems.
- Recommended and implemented performance improvements on group projects.
- Took soft skill courses targeted at improving personal non-technical portfolio, like self management, emotional intelligence and relationship management

### Freelance Developer

April 2022 - PRESENT

- Building and designing software solutions for clients based on their budget and requirements.
- Carry consultations on projects to enable clients to have awareness of the best possible way to approach a project and have 100% efficiency and quality.
- Implementation and integration of backend/databases for clients using firebase and sanity CMS.
