Khalil is a passionate Frontend Developer with experience on the Backend. He has a knack for crafting user-friendly and visually stunning web applications. Leveraging the MERN Stack to deliver seamless user experiences.

I'm a firm believer in continuous learning and staying ahead of the curve in the ever-evolving web development landscape.

I'm eager to tackle challenging projects and collaborate with clients to bring their ideas to life. Let's connect and discuss how I can help you solve your web development needs!

## EXPERIENCE

### Give Aid — Co-Founder, Fullstack Developer

November 2023 - PRESENT

- Led a collaborative team of 7 in the design, development, and deployment of a groundbreaking platform for charitable causes.
- Spearheaded the development of the platform using the MERN (MongoDB, Express.js, React.js, Node.js) stack, with additional implementation in TypeScript for enhanced code quality and maintainability reducing the number of runtime errors by 15%.
- Collaborated on the frontend, crafting a user-friendly client-side experience, and contributed to the backend to establish robust authentication, authorization systems using Clerk and MongoDB for database.
- Enabled organizations and individual fundraisers to create profiles, streamlining the onboarding process and enhancing the vetting mechanism for increased transparency and developed dashboards for users allowing them to manage their fundraisers.
- Engineered an admin dashboard that centralizes control, allowing administrators to review and approve fundraisers before making them visible to users.
- Implemented a comprehensive search and filter system, enhancing the user experience and resulting in a 25% increase in user engagement.

### FindschoolsNG — Junior Frontend Developer

June 2023 - PRESENT

- Development of a dynamic web application using TypeScript and Next.js, revolutionizing how over 100+ schools connect with students and parents.
- Collaborated closely with cross-functional teams to design and

## SKILLS

HTML,

CSS: Styled-Components,  
SASS, TailwindCSS, Chakraui.

Frontend: React.js, Next.js,  
Typescript, Vue.js, Nuxt.js,

Wordpress

Backend & Database: Node.js,  
Express.js, MongoDB,  
Firebase

State Management Tools:  
Redux, Vuex

Tools: Tanstack React Query,  
React-Hook-Form, Formik,  
Clerk

CMS: Sanity

Version Control Systems: Git,  
GitHub.

## LANGUAGES

## MY PORTFOLIO:

<https://portfolio-khalil.vercel>

implement a user-friendly frontend, utilizing responsive design principles to ensure optimal user experience across various devices, resulting in an engaging and intuitive experience for hundreds of users including schools, administrators, and students.

- Created personalized school dashboards and profiles, empowering schools to onboard and manage their data efficiently, showcasing real-time analytics and enhancing the accessibility of essential school details for users making informed decisions.
- Implemented robust search and filtering functionalities, enabling users to effortlessly discover hundreds of nearby schools, explore renowned institutions, and efficiently compare school statistics.
- Collaboratively participated in code reviews, providing constructive feedback and promoting code quality, leading to a more reliable and maintainable codebase and reducing the number of post-release bugs

## **AltSchool Africa — Mentor**

May 2023 - October 2023

- Empowering 10 aspiring frontend engineers as a dedicated mentor, providing personalized guidance and support through one-on-one sessions and engaging group discussions resulting in a good student satisfaction rate and consistently high levels of engagement and retention.
- Fostered a collaborative learning environment by facilitating code reviews and collaborative projects, enabling students to gain practical experience and refine their problem-solving skills.
- Provided expert guidance in industry-relevant tools and technologies, such as JavaScript frameworks, CSS preprocessors, and version control systems, equipping students with the practical skills needed for real-world frontend development.

## **Freelance Web Developer — Self employed**

2022 - PRESENT

- Designed and developed websites for small businesses and individuals using Wordpress, Next.js + Typescript and Vue.js.
- Building and designing software solutions for clients based on their budget and requirements.
- Carry consultations on projects to enable clients to have awareness of the best possible way to approach a project, understand their needs and provide creative solutions.
- Collaborating with other backend developers to create scalable and maintainable software solutions.
- Implementation and integration of backend/databases for clients using firebase and sanity CMS.

## PROJECTS

[FindschoolsNG](#): A company connecting parents and students with schools, making it easier to discover schools, compare them and choose the best.

[Give Aid](#): A platform where charitable causes can showcase their fundraising campaigns and connect with donors, giving donors access to a diverse range of charitable causes that they resonate with.

## EDUCATION

### **AltSchool Africa — *Diploma in Software Engineering***

April 2022 - July 2022
