EXPERIENCE

AltSchool Africa School of Software Engineering — *Student*

April 2022 - PRESENT

- Studied programming using a structured, proven curriculum that enables students become job ready with a complete set of software development skills.
- Took technical courses from 5+ instructors with expertise in web development.
- Interacted and brainstormed live with instructors 2 times a week every semester.
- Completed real-world projects and received code reviews/feedbacks from instructors and the school community of 500+ students.
- Placed in a team circle of 10 and worked together to solve problems.
- Recommended and implemented performance improvements on group projects.
- Took soft skill courses targeted at improving my non-technical portfolio, like self management, emotional intelligence and relationship management
